Feature Checklist

MRP Plus™

General Information

MRP Plus Software

Horizon Software, Inc. is proud to present "MRP Plus", a complete, integrated, graphical ERP software package for manufacturers.

MRP Plus is designed to provide you with solutions to most common business problems; Material Shortages, High Inventories, Substandard Quality, Inadequate Customer Service, Poor Productivity and Inferior Cash Management.

Designed to run on the Microsoft Windows Platform, including Windows 7 and 2008 R2 server, MRP Plus was built from the ground up using Microsoft's Access and Visual Basic.

The MRP Plus manufacturing software is sold as a complete system. Modules included with MRP Plus are; Accounts Receivable, Accounts Payable, Bills Of Material, Budgeting, Capacity Planning / Routing, Costing, General Ledger, Inventory Control, Invoicing, MRP, Purchasing, Sales Analysis, Sales Order Processing, Shop Floor Control and Work Order Control.

MRP Plus Web Site

http://www.mrpplus.com

The MRP Plus web site is the quickest way to learn more about MRP Plus. You can overview the package features, or download the concepts manual and register for access to MRP Plus in the Cloud, to further assist in evaluating MRP Plus.

In addition, get the latest information about MRP Plus SQL version.

Implementation

MRP Plus is delivered with an installation Guide and a complete set of operations/implements guides, designed to help you plan and achieve successful system implementation.

In addition, our in-house consultants are available to assist in implementing MRP Plus. They can help in areas such as conversion, training, modifications and general consulting.

Support

MRP Plus comes with 90 day unlimited email support for problem resolution. Our trained support staff will answer your questions and keep you moving toward your goal of getting live.

On-going telephone support is available at standard hourly rates, billed on the quarter hour. And reduced rates are available for companies subscribing to the MRP Plus applications support agreement.

Upgrades

Interim upgrades are provided at no charge for companies subscribing to the MRP Plus Maintenance Agreement (There may be an integration charge for custom modified versions). When an interim upgrade becomes available, it is posted to the Customer Login section of the MRP Plus Web site for downloading and integration. Documentation highlighting new features, enhancements and fixes are also included.

Customization

Realizing that MRP Plus can't be all things to all companies, we offer customization services with our product. If your company needs a special report, fields added to a screen, or a process changed; our programming staff is up to the task. If you prefer, **available with our Release 10, the source code of company forms and most MRP Plus reports is available for you to make your own modifications.**

Education

Our instructor-led web-based training is designed to educate the new MRP Plus user in the most cost-effective manner possible. Our web-based training covers Implementation, Sales & Invoicing, Purchasing, Accounting, Inventory, Work Orders, MRP and Costing. The training consists of 3 hours a day, 3 days a week, for 3 weeks. There is no limitation on the number of trainees that can observe at one time, however only 3 web connections are supported for the interactive sessions. You can even use an overhead projector to educate a large group all at once.

Classroom and on-site training is available for all aspects of MRP Plus. Classes are designed around MRP Plus functional areas; Production & Inventory Control, Sales & Customer Service, MRP & Work Order Processing, Financial & Accounting; Access Security & Database Administration.

Conclusion

MRP Plus is a complete ERP system designed to run your company. All the tools necessary from training, through implementation, support, customization and upgrades are available from one organizational source.

Our organization is committed to helping your company have success with MRP Plus. We provide the trained staff, facilities and tools necessary to insure a successful implementation.
